Elevator Pitch: A massive Pathfinder database that simplifies character creation for players. Also great for a quick reference. Replaces having to look up every spell/ability when used. New pathfinder players could come less overwhelmed.

We are working on an app that makes Pathfinder gameplay easier for new players and Game Masters. An easy to use database that can quickly look up abilities/spells, both for character creation and in play information.

Document Assumptions
Dungeon masters have a hard time getting D&D players to play pathfinder because of the complexity of playing Pathfinder.
D&D players prefer the variety of Pathfinder but find it too complex.
The players invited by the DM to the DM's account have no to moderate background in Pathfinder rules.

Problem Statement
Identify which sets of rules/ campaigns are the most popular.(Spheres of Power, Sphere of Might, Psionics, Extra classes, Hybrid class).
Identify the expectations of Dungeon Masters and players when signing up for the app
Identify the main reasons people have a hard time with Pathfinder.
Identify the likelihood of using the app for gameplay.
Identify how much players would be willing to pay for this service.

Address your problem statement
Most importantly we need to make sure the people filling out our survey have played D&D before or some other kind of tabletop RPG.
Explain the situation of Pathfinder vs 5.0 to people that have no idea what that means
